DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment submitted on 1-/26/04 and 1/26/05. Currently claims 36-39 are currently pending. With respect to the 102(e) rejections, applicant has shown, in the parent application, (10/266,975) that they are entitled to an effective filing date that is before the effective filing dates of US Pat No. (6,299,793; 6,436,310 and 6,440,325) and accordingly the previously made 102(e) rejections are withdrawn. Upon the indication of allowable subject matter the examiner will institute an interference with the above US Patents. See MPEP 2306.1.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 38-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

As stated previously 38-39 are not supported by the specification as originally filed as there is no explicit recitation of a thickener. Applicant has previously tried in the

Art Unit: 1755

arguments filed with the preliminary amendment to show where the support lies however it is the position of the examiner that the portions of the specification the applicant is relying on for support, do not adequately provide proper support for the addition of a thickener. The portion pointed to by applicant does not positively state the addition of a thickener, it merely states that when the "carbohydrates are added to salts such as potassium acetate, the viscosity and wetting abilities of the anti-icing compound are increased". It is not seen as to how this provides support for the addition of a thickener to a sugar (carbohydrate) and a chloride salt. Also with respect to claims 38-39 applicant has tried to amend the claims by the addition of the phrase "effective viscosity increasing amount" for the thickener however as stated previously there is no explicit recitation of the addition of a thickener. Accordingly based on the discussion above applicant has not provided proper support for the invention as now claimed and the recitation of a thickener is still considered to be new matter.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 36-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 38-41 of copending Application No. 10/266,975. Although the conflicting claims are not identical, they are not patentably distinct from each other because the reduction to practice of the claims of the copending application would render obvious the instant claims. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The claims of the copending application are encompassed by the instant claims. Applicant agree that upon patenting of the parent application that a terminal disclaimer will be filed however this rejection cannot be overcome until an acceptable terminal disclaimer is submitted.

Information Disclosure Statement

6. The information disclosure statement filed 4/29/05 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the

examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
